OBJECTIVE

Information Systems graduate with internship experience in Product Analysis and hands-on expertise in Business Analysis and Data Analytics within healthcare information systems. Experienced in requirement gathering, business process analysis, functional documentation, and cross-functional collaboration to support product development. Proficient in SQL, Tableau, ETL, and Microsoft Excel, with a passion for delivering data-driven solutions and improving business processes.

EDUCATION

Del Institute of Technology | Toba, North Sumatera, Indonesia

Information Systems, Faculty of Informatics and Electrical Engineering (Aug 2022 - Sept 2026)

EXPERIENCE / INTERNSHIP

PT Jejaring Tiga Artha | Product Analyst Intern | South Jakarta

(Jun 2025 - Aug 2025)

Projects: Analysis and Feature Enhancement Recommendation for the Mortuary Administration Module in the Zi.Care Hospital Information System (Zi.Care HIS)

- Gathered and analyzed business and user requirements to identify operational challenges within the Mortuary Administration module.
- Analyzed existing business processes and workflows to identify opportunities for improving operational efficiency and user experience.
- Developed functional documentation, user stories, process flows, and feature recommendations based on business requirements and stakeholder needs.
- Collaborated with stakeholders and the development team to validate requirements and ensure proposed solutions aligned with business objectives.
- Conducted functional testing and documented findings to support feature validation and future system enhancements.

Del Institute of Technology | Computer Network Teaching Assistant | Del Institute of Technology

(Aug 2024 - Jun 2025)

- Assisted lecturers in conducting computer network laboratory sessions and delivering hands-on technical guidance to students.
- Guided students in understanding networking concepts, configuring network devices, and completing laboratory assignments.
- Evaluated practical assignments and provided constructive feedback to support students' learning outcomes.
- Prepared laboratory materials and maintained technical documentation to ensure effective and organized learning activities.
- Supported troubleshooting of networking configurations and technical issues during laboratory sessions.

PROJECTS

Student Admission Data Warehouse & Business Intelligence Dashboard

Data & Business Analyst | Del Institute of Technology (2025)

Tools: PostgreSQL, Tableau, Pentaho, ETL, Microsoft Excel, GitHub

- Gathered business reporting requirements and translated them into business intelligence solutions to support data-driven decision-making.
- Designed a star-schema data mart to optimize analytical reporting and performance evaluation.
- Developed ETL workflows to integrate, cleanse, and transform data from multiple sources.
- Built interactive Tableau dashboards to visualize admission trends, key performance indicators (KPIs), and operational performance.
- Analyzed historical admission data to identify trends and generate actionable insights for strategic planning.

House Price Prediction Using Machine Learning

Data Analyst & Machine Learning Project | Del Institute of Technology (2025)

Tools: Python, Pandas, Scikit-learn, XGBoost, Random Forest, Flask, Tailwind CSS, GitHub

- Applied the CRISP-DM methodology to develop a machine learning model for predicting house prices using the Kaggle House Prices dataset.
- Performed data preprocessing, feature selection, missing value handling, and feature scaling to prepare data for modeling.

- Built and evaluated multiple regression models, including XGBoost, Random Forest, and Ridge Regression, using RMSE, MAE, and R² metrics.
- Analyzed feature correlations and generated insights on the key factors influencing house prices.
- Deployed the final prediction model using Flask and developed a responsive web interface with Tailwind CSS for real-time price estimation.

Tiket.com Database System Design

System Analyst & Database Designer | Del Institute of Technology (2023)

- Analyzed business requirements and translated them into database and system specifications.
- Designed Entity Relationship Diagrams (ERDs) and relational database schemas based on business requirements.
- Developed SQL queries to support transaction processing, reporting, and data analysis.
- Collaborated with project team members to ensure database solutions aligned with system requirements.
- Prepared technical documentation to support database implementation and future maintenance.

SKILLS

Hard Skills

- Business Analysis: Requirement Gathering, Business Process Analysis, Functional Specification, User Story, Process Flow Documentation, Functional Testing
- Data Analytics & Business Intelligence: SQL, Data Analysis, Data Visualization, ETL, Dashboard Development, Tableau, Microsoft Excel
- Database & Programming: PostgreSQL, MySQL, SQL Server, Python, Java, JavaScript, PHP
- Tools: Figma, Jira, Postman, Pentaho Data Integration, Git, GitHub, Trello, MySQL Workbench

Soft Skills

Analytical Thinking | Problem Solving | Communication | Stakeholder Collaboration | Teamwork | Critical Thinking | Adaptability | Time Management
